marietenten50@gmail.com / 410-564-7988 / 2665 Cedarvue Drive, Pittsburgh, Pennsylvania

Summary

I'm freelance developer (game and web) looking to make things that people use and enjoy. I've been working on games and websites for 2-3 years and studying computer science for 4-5 years, and look to continue into a career after highschool.

Experience

Team Member/Cook

Noodles & Company • Pittsburgh, Pennsylvania
07/2021 - Present

Working in a team environment to make customers food, keep up with constant orders, and provide a product using hands on methods.

Smart Desk Member

Upper Saint Clair High School Smart Desk • Pittsburgh, Pennsylvania
08/2018 - Present

As a smart desk member, I work to provide technological support to the Upper Saint Clair School district as a student. Maintaining servers, fixing OS problems, and direct hands-on help with students and teachers. We work together to create an environment that supports the entire school district.

Education

IT Tech Game Design & Development Camp

Carnegie Mellon University • Pittsburgh, Pennsylvania

During this camp I worked in Unreal Engine to make and develop my own 3D game. The camp was a week long and sparked my interest into the development of games.

Inspirit AI Program

• Online, United States

In the Inspirit AI program I was taught skills in depth about AI, specifically Natural Language Processing. At the end of the week long course of python training in Tensor Flow, we presented our findings in a powerpoint presentation.
